### Amazon.com: Air Shocks Ford Expedition

The Expedition has an air suspension system that replaces the traditional spring suspension in vehicles. The air suspensions system is controlled by the engine and deflates when the car is turned off. If the car is left unused for an extended period of time, it deflates the suspension and lowers the vehicle to the ground.

### **Air Ride Suspension Issues for a 1999 For Expedition 5.4L**

Hi. We just bought a 1999 Expedition and we are trying to find out where the air suspension switch is and is the car suppose to be very low in the back when it is off? Also, if not is there a switch some place to click on so that it can be at the normal height when it is off? Or am I getting it wrong, should it only lift when it is on?
