Blockchain can power your business processes and give rise to industry ecosystems. But there's no point in re-creating the old world, but with a blockchain at its core. The danger in not recognising this paradigm shift from the outset is that you end up reasserting existing roles, processes and business models. Instead, you need a commitment to a strategy that is suitably transformed from ...

Make the blockchain business case: evolution, not revolution

The magic wand of blockchain technology has touched our lives in multiple ways over the last decade. It has made cryptocurrency traders out of ordinary investors who would even shy away from the traditional stock markets. It has provided us with an easy way of transferring money across borders, without the interference of banks.

Blockchain & The 4th Industrial Revolution

Blockchain has struggled to discover a function, beyond powering cryptocurrencies like Bitcoin. In that scenario, the blockchain acts as a universal record of every Bitcoin deal ever made. The blockchain is a ledger, or log, of those transactions and users on the network work together to verify new transactions when they occur.
