### McGraw Hill Canada | Financial Accounting

The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial ...

**Financial Accounting: Libby, Robert, Libby, Patricia ...**

Present value factor is calculated by dividing the total investment by net cash flow during the year. Present value of investment for a future period is computed by adjusting the total investment with present value factor based on the corresponding rate of return. According to the table B.1, for 6 years at 10% per annum rate, the present value factor is 0.5645.
