I noticed that the 4G52, 4G54 and 4G63 engines use an "oil separator. What is its function? The truck we are working on now has a 4G52 with 5500 hours and has the same compression as a new engine. The is a small hose that goes from the valve cover to the governor. When we disconnect the hose the engine stops smoking. Any ideas.

The 4G54, or G54B, engine is also known as the Mitsubishi Astron engine. Production on this engine began in 1972. With a chain-driven single overhead camshaft, or SOHC, and eight valves, this engine provides plenty of torque for vehicles. Some features of this engine include heads with additional jet valves to improve ...
