In the previous answer, I learned how to display events as separate lists under each location, sorted by date. for this exercise, I wish to consolidate all events into a single list consisting of three columns (date, event, location), sorted in that order, and do so using formula. As in the previous exercise, pivot tables are out of the question.

Excel - Display an excel table/matrix as a list using formulas

The review of the 10 most popular to-do list systems is a great way to then introduce the new formula which improves on all of the systems. It's a real game changer for me as I'm now following the system unmodified (the book does suggest you can and should modify the system for you) and already giving me greater clarity and control of my ...

To-Do List Formula (Audiobook) by Damon Zahariades ...

In the formula =2*(3+2) the first operation Excel completes is the one inside the brackets (3+2), with the result of 5. It then performs the multiplication operation, 2*5, with the result of 10. (The values in the formula could be represented by cell references rather than numbers, but Excel would perform the operations in the same order.)
